

SHARADIA – ACTIVITY

SUITABLE FOR ALL AGES

- 1.** The set contains a playing board and 2 packs of credit cards for each category (5 – social, sharing, media, security and joker). Just print the set and let the kids cut them out, bend them in the middle and stick them together, as they would be printed on both sides, or do it yourself.
- 2.**

All you need is the printout, pair of scissors, glue and dice (or a dice app on your phone). Let your students use their imagination by choosing their avatar from various objects in the classroom.

- 3.** Place the cards on 5 decks according to color/topics. Students then create teams depending on the number of students in your group. Each player rolls the dice and lands on a colored spot, then the player picks a card according to the color and sees the word.

The joker is the special card- when your students end up on Joker he/she is free to make up the word, as long as it is related to computers and online space, and tell it to the teacher for verification.

He keeps the word to him/herself and decides whether the depiction word will be described without using the root of the word, or by drawing on a black/whiteboard. The team that guesses the correct answer gets to move the amount of steps rolled with the dice. The team that reaches the end first wins.

- 4.** One pack of cards contains words which are suitable for all ages, while the other pack includes words that are more suitable for older pupils in the 2nd stage of elementary school. Be careful to only choose suitable and age appropriate words for your pupils. You can mix and match the cards from both packs as well. The game is based on public speaking and interaction, and since every teacher knows his/her students best, please make sure that everyone feels safe.
- 5.** After playing this game with your pupils start a discussion about words that students don't understand or the whole topic of internet security – for more information about it go visit www.eset.com
